

VEHICLE CESSPOOL LEVEL SENSOR

ABSTRACT OF THE DISCLOSURE

A vehicle cesspool level sensor includes a mounting
5 base, a stainless steel detection tube welded to the bottom side
of the mounting base to hold a detection circuit on the inside, an
end cap welded to the bottom end of the stainless steel detection
tube, a float axially movably mounted the detection tube and
movable, the float having two magnets symmetrically disposed
10 at two sides and adapted to induce the detection circuit, a
stainless steel strainer fastened with the top end to an endless
locating flange at the bottom side of the mounting base, and a
strainer cover capped on the bottom end of the stainless steel
strainer and fastened to the end cap with a screw.
